WORK EXPERIENCE

Co-Founder
Penmaniacs

12/2022 - Present

Penmaniacs is an AI educational assistant that helps students learn, study and write faster.

Achievements/Tasks

- I was involved in building the product from just an idea to a product generating revenue. I ideated, designed, built and deployed the tool to production.
- I bootstrapped the startup to thousands of users with revenue growing month-on-month.

Software Engineer
Venngage

05/2021 - 03/2023   *Canada*

Venngage is a simple infographics tool that enables people to create beautiful infographics in minute

Achievements/Tasks

- I worked with other developers to launch different products and in rebranding the company's website. This helped to increase the user base to 5 million.
- We launched the Color blind simulator, Color palette generator and many other accessibility tools to help the user generate accessible designs.

Smart Contract Developer
Kapitly

09/2022 - 10/2022   *Ireland*

Kapitly is a blockchain crowdfunding platform for green project

Achievements/Tasks

- I worked with the team to build the smart contract to handle project crowdfunding. I also built the marketplace to trade the project tokens.
- I designed and built the frontend of the DApp and integrated the smart contract into it.

Frontend Developer
Clout Wallet

04/2021   *United States*

Clout Wallet is a crypto portfolio management platform built on top of Bitclout.

Achievements/Tasks

- I was in charge of building the platform dashboard and integrating the necessary API to make the platform ready for launch.
- I integrated the Bitclout API to help the user visualize and manage their Bitclout investment.

EDUCATION

BACHELOR OF TECHNOLOGY
Federal University of Technology, Akure

2015 - 2021

SKILLS

REACT JS   NEXT JS   NODE JS   REDUX

MONGODB   HTML   CSS   JAVASCRIPT

LANGCHAIN   PROMPT ENGINEERING   LLM

EMBEDDING   TAILWIND CSS   BOOTSTRAP

PROJECTS

CoronaX (COVID-19 Telegram chat bot) (03/2020 - 04/2020)

- I developed a telegram chatbot to provide news, statistics and live updates about COVID-19.
- I used Node JS to scrape information from various websites to serve the chatbot.
- Technologies used: Node JS and Telegram API

Content Management System (02/2020)

- I created a content management system for a news website.
- I used Node JS for the backend and MongoDB for data storage
- Technologies used: Node JS, Express JS, MongoDB, HTML, CSS and Javascript

ACHIEVEMENTS

Soonami Hackathon (3rd Position) (08/2023)

My team developed Startup Assistant, an AI-powered platform that simplifies the startup journey for entrepreneurs. Our solution won the 3rd position

Naija SDGs Hackathon (Winner) (04/2021)

My team developed an investment platform to fund solar installation projects thereby making solar energy accessible to everyone. Our solution won the hackathon.

FutureHack 2019 (Top 10) (08/2019)

My team developed an e-learning platform that helps people to learn relevant industrial skills using aggregated content from industry experts and peer assessment. Our solution made it to the top 10 in the country.

Startup Istanbul (100 Pitching Startup) (08/2019)

I created an accommodation reservation platform for college students. My startup was among the 100 startups selected from around the world to pitch their startup idea in Istanbul
